

LA ODE MAHDANI

Surabaya, Jawa Timur | [+62 852 2083 8947](tel:+6285220838947) | ode.m.dani@gmail.com

TENTANG SAYA

Software Developer with 5+ years of experience in web and application development. Strong expertise in React Native, Golang, and PHP, with hands-on experience using Docker for deployment and environment management. Passionate about building scalable, maintainable, and production-ready systems.

PENGALAMAN KERJA

PT BRANKAZZ DIGITAL SYARIAH

Full Stack Developer | Feb 2019 - Apr 2026

- Developed Laravel fintech backend APIs for transaction processing system
- Built React Native mobile application for digital payment services
- Integrated backend APIs with mobile app authentication and transactions.
- Created Telegram bot automation using Laravel Botman conversation flows.
- Designed relational database schema for customers suppliers transactions.
- Implemented queued transaction processing ensuring sequential reliable execution.
- Configured secure API integrations using environment variables (.env).
- Managed deployment and storage consistency across multiple application versions.
- Resolved production issues related to shared storage architecture systems.
- Collaborated across backend and mobile teams for scalability.

PT SWARNA DWIPA PROPERTY

Part-time Backend Developer | Apr 2021 - Jan 2025

- Managed salary, attendance, supplier, and materials modules.
- Implemented cron jobs for automation and reporting.
- Designed database structure for multi-entity workflow system.
- Built Laravel PWA system for workforce operations.
- Improved efficiency by digitizing manual business processes.

PENDIDIKAN

SMK YAPIS FAKFAK

Computer Engineering | Jul 2015 - Jun 2018

KEMAMPUAN

- CI/CD
- React Native
- Python
- Kubernetes
- PHP
- JavaScript
- PostgreSQL
- Docker
- COBOL
- REST API

SERTIFIKAT

Redis: The Complete Developer's Guide

Udemy - Stephen Grider | May 2026 - Jun 2026

Completed Redis course covering caching, pub/sub, and data structures. Improves backend performance, scalability, and API optimization for high-traffic systems.

Pemrograman Go-Lang: Pemula Sampai Mahir

Programmer Zaman Now | Aug 2025 - Oct 2025

Completed Go course covering basics, concurrency, REST API, and backend fundamentals for scalable application development.

Hacking Using Social Engineering

Udemy | Feb 2021 - Mar 2021

Learned ethical hacking, OWASP Top 10, social engineering, and system vulnerabilities to build more secure backend applications.

Cobol Programming

IBM | Nov 2020 - Jan 2021

Studied COBOL programming, mainframe systems, batch processing, and enterprise legacy systems used in banking environments.
